

Making Lives Safer Through NANOTECHNOLOGY

FendX is a nanotechnology company developing products to make people’s lives safer by reducing the spread of pathogens. The Company is developing both film and spray surface coating products to protect high touch surfaces from contamination. Our lead product, REPELWRAP™ film under development repels bacteria and viruses which prevents them from attaching to the film’s nano-surface. Our spray coating formulation in development demonstrates similar repelling properties as well as the ability to kill any residual bacteria and viruses. These properties reduce contamination on the nano-surfaces, resulting in significant reduction in the spread of pathogens.

Investment Highlights

- Award-winning, patent-pending nanotechnology
- Building a robust patent portfolio
- REPELWRAP™ film, ready for scale-up with a path to commercialization
- Numerous potential applications in healthcare and other industries
- Pipeline of products under development including spray formulation, REPELWRAP™ film line extensions and coating catheters
- Strong leadership team with proven track record

Share Structure

As of September 30, 2023

Common Stock	52,991,606
Stock Options	2,741,667
Warrants	15,905,807
Bonus Shares ¹	4,150,000
Fully-Diluted	75,789,080

1. Shares issuable upon satisfaction of certain development milestones.
